

- Upon opening the dashboard file, you will be taken to the main menu:

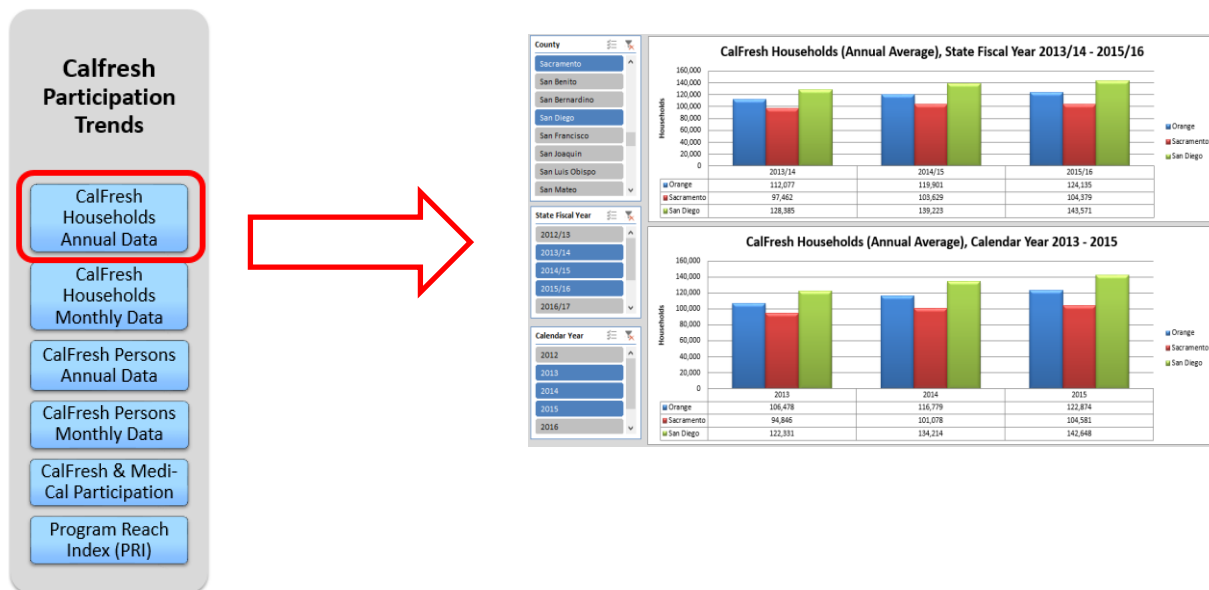

The main menu serves as the dashboard's directory, with each blue button leading to a different category of CalFresh data, as well as external "Resources and Tools."

- CalFresh data are available in two forms, as a raw spreadsheet or in the form of interactive charts. Raw data tables are organized by the frequency of data collection. Clicking on any of the buttons will guide you directly to the corresponding raw data table:

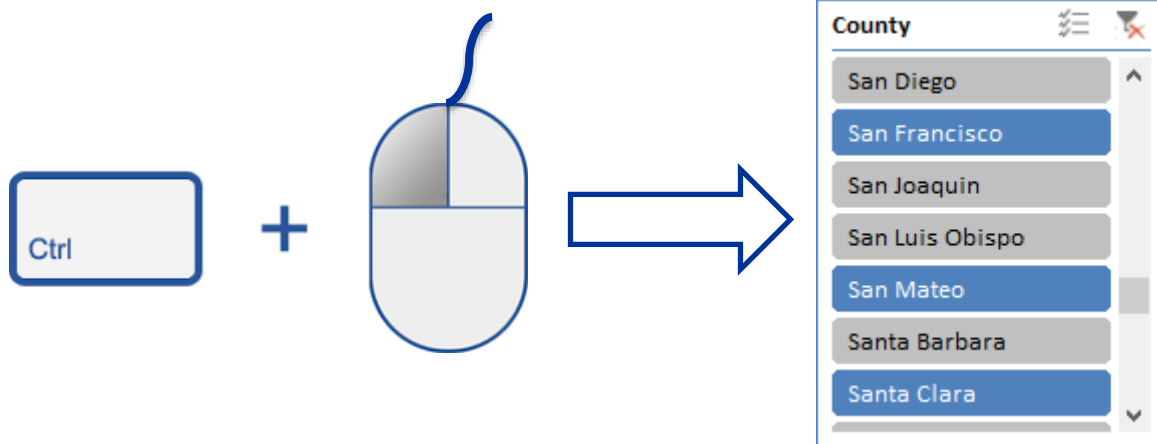

County	Casscode	Month	Calendar Year	FY	SFY	CF_Hhs	CF_Persons	MC_Enrollment	Timeliness_30_Day	Timeliness_Expd_Pct_Mon	Active_Error_Rt

- To view a particular data element using interactive charts, click on the corresponding button and you will be taken directly to a page where customizable visualizations of the data can be created.

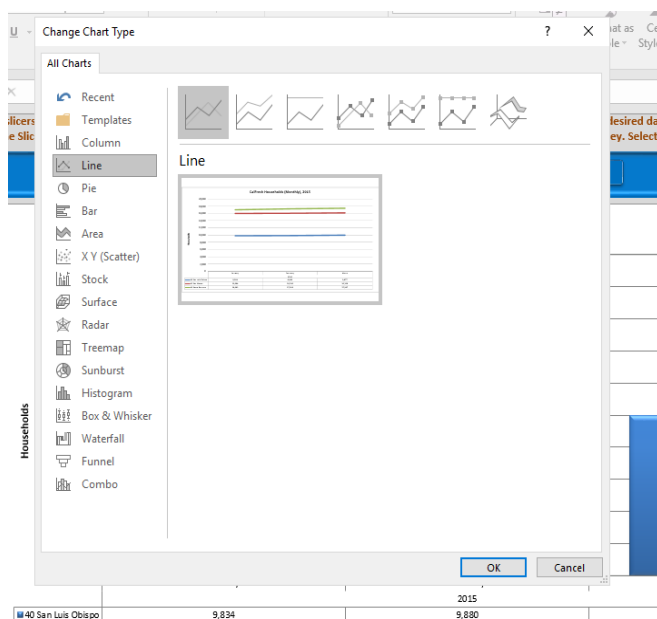

- For each chart, you will need to use the slicer menus located on the left-hand side of the page to make the appropriate selections (e.g., counties, years, months).
- To make more than one selection in any of the slicer menus, hold down the “Ctrl” key while clicking each of your choices. After letting go of the “Ctrl” key and mouse, the chart will automatically update with your selections:

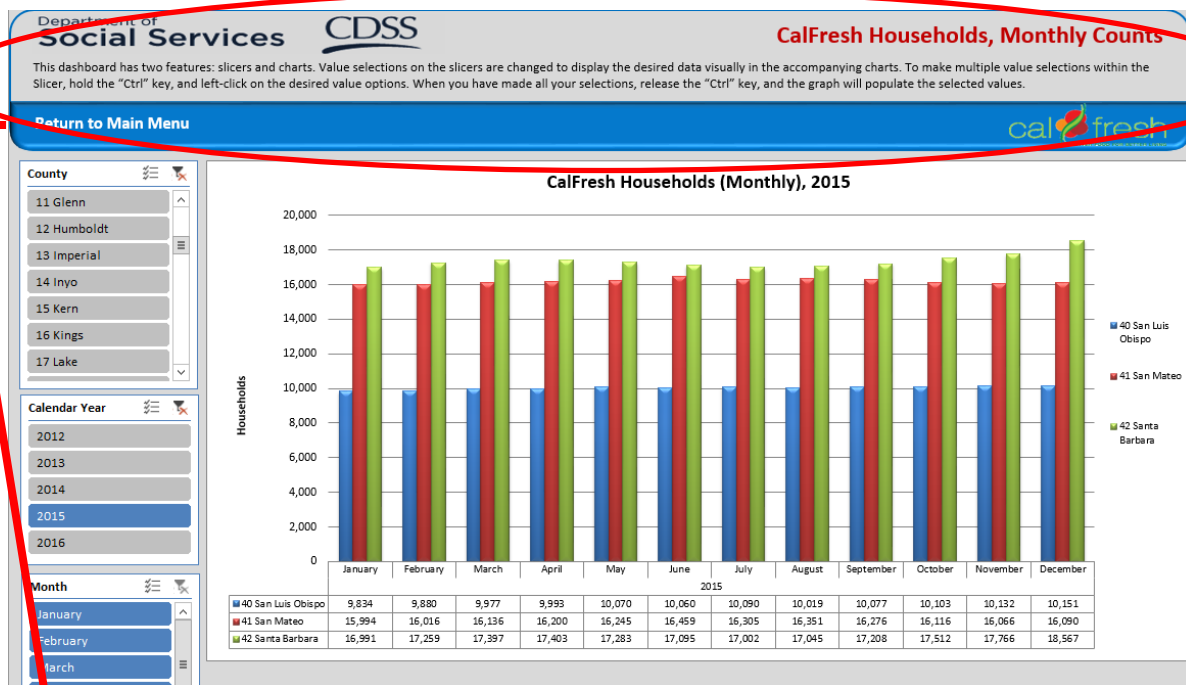

- The interactive charts are also open-sourced, allowing you to change the type of chart shown. For example, the CalFresh Households (Monthly) chart is default-set to be visualized as a bar chart, but if you prefer to visualize this data as a line chart, simply right-click anywhere within the chart area and select “Change Chart Type” from the menu:

- Then select your desired chart type from the menu and click “OK”:

- To navigate back to the main menu, use the navigation area located at the top of any page:
